EXPERIENCE

AAJ Express Logistics, Lagos Nigeria — Lead Software and API Engineer (Contract)

June 2022 - PRESENT

I Lead a team of software developers. Here I'm working closely with the company to optimize their entire business workflow using tech, this includes several API systems (microservices) and a logistics/package delivery system.

Tunga.io, Lagos, Nigeria — Python Developer

September 2021 - February 2022

A private freelancing organization connecting top vetted African tech talents to global organizations. Here I worked as a python (Django) developer.

Aldabra AI (startup) - Lead Software Engineer/co-founder

December 2020 - November 2022

The idea was to revolutionize the African health system with software and AI. This was my first time working in a startup environment and I led the team to the best of my ability and I also gained new skills while doing it. My areas of expertise included API development, Agile/Project Management, and Product Design.

Elon Multifacet High-Tech Ltd, Lagos, Nigeria — Junior Python Developer

September 2019 - October 2019

Assisted senior developers and wrote technical documentation and also articles for their online learning platform.

EDUCATION

ALX-Holberton, Online Intranet — Software Engineering

June 2021 - June 2022

An intensive software engineering program to prepare me for a career as a software engineer. I learned to meet up with deadlines by completing daily and weekly tasks as well as projects, while learning I mastered in-demand software skills, frameworks, and industry best practices.

SKILLS

Python, Bash, C, HTML, CSS, JS, Rust

Django, Django Rest Framework, Flask,

PostgreSQL, MySQL, MongoDB, Redis, SQLAlchemy
